ALL ON-CAMPUS CLASSES SUSPENDED

Dear Cornerstone Community

In line with COVID-19 being declared a global pandemic and our President declaring a National State of Disaster, all campus activity was suspended effective Monday, 16 March 2020. Although there are no confirmed cases among our students, staff or faculty this was done in order to play our proactive part in flattening the curve of this virus.

Executive Dean, Rev Dr Rudi Buys issued a directive for the mid-semester academic break to be suspended with immediate effect. This means:

- All online students remain unaffected and will proceed with their academic programme.
- Faculty is currently developing a learning plan that ensures campus students can continue with their studies remotely. The details of this learning plan will be communicated to the campus students no later than Friday, 20 March 2020.

As the CEO, I have issued a directive for all staff to work remotely. This means:

- We are still functional as an institution so enquiries and applications will be responded to and processed accordingly.
- We ask for your understanding and patience in the response time as we transition to this new format of working.

We implore all South Africans to maintain good hygiene measures, social distancing and self-isolation. We need to play our role in ensuring that this virus doesn’t spread and to keep South Africa safe. We call on every South African to change their behaviour so we can flip the switch on COVID-19.

For more information and enquiries, please email info@cornerstone.ac.za

Regards,

Noel Daniels

Chief Executive Officer
